Paul and Carol:

Attached is the 2019 Annual Operation Maintenance and Monitoring Report for the Northrop Grumman Bethpage Facility. This contains the groundwater withdrawal information that you requesting.

I would certainly be interested in discussing the outcome/s of the Five-Year Review with you to better understand the relationship between the two sites.

Thanks,
Jason

Subject: Pumping data for Northrup Site

Hi Carol,

I'm a new Hydro in TSS and Mike Scorca and I are working on a FYR for the Hooker Ruco site in Hicksville, NY. The Northrup Grumman site is just south of the Hooker Ruco site and there is some comingling of the plumes. For the data review, we were curious if you would be able to provide a recent Northrup monitoring report that would have pumping information for Northrup Well 3R? If not, do you think you can point us in the right direction?

Thank you,

Paul
